

250th Anniversary of our nation

 Trial Garden 2026 
GROSSE POINTE FARM & GARDEN CLUB

Our fathers brought forth on this continent, our nation and declaring our independence, therefore planting the foundation of our country. So we plant our gardens in honor of 250 years.

In keeping with the theme, we honor the colors of our flag, by planting red-white-blue plants. GPFG has chosen a variety of plants to compliment our garden features such as the blue flagstone path, small bench, along side the birdbath and the lovely wrought iron fence. Beyond... sitting on the hill, sits a "bald eagle" perched on top of the "liberty bell" with grasses flowing in the background.

As I had the honor of planting this garden, I had the privilege of experiencing the reminders of how great our country is and the freedoms that we share and enjoy. To name a few... the waters of Lake Sinclair with the freighters passing by, the magnificent "Les Brave" structure, symbolizing the alliance and appreciation between USA and France, the helicopters and occasional fighter jets flying overhead making sure ours, along with our neighboring country Canada's, shores are safe. And if you're really lucky, an occasional sighting of a "Bald eagle" soaring above. All sits upon the Veteran's garden and grounds of the beautiful "Alger Estate".

 GOD BLESS AMERICA
